

SDSP One-Pager Email Template — Plug-and-Play Guide

This is a reusable email template for SDSP welcome / community-intro emails, designed to go out to new subscribers (or anyone you want to (re-)introduce SDSP to). The visual design matches the SDSP brand established in the workshop template.

Most of this template is stable — the welcome paragraph, closing, social row, and footer don't change per send. The only true fill-in section is the event cards (block 04 / 05). For most sends you'll only touch the event cards.

To use it:

1. Open each `.html` file in any text editor.
2. Find every `{{PLACEHOLDER}}` and replace it with your content.
3. Copy the file's contents and paste into an Emma **HTML block** in the order below.

Tip: Use your editor's Find & Replace (`Ctrl+H` on Windows, `Cmd+H` on Mac) to swap placeholders quickly.

How to assemble in Emma's drag-and-drop editor

Emma uses **rows** (with 1-4 columns) and **content blocks** that you drop into columns. You'll add rows top-to-bottom in this order:

#	Row layout	What goes in it
1	1-column	Image block (upload full SDSP logo with tagline, ~327px) then HTML block with <code>01_header_title.html</code>
2	1-column	HTML block with <code>02_welcome_paragraph.html</code> (<i>stable boilerplate — rarely edited</i>)
3	1-column	Divider block (native Emma block, light grey)
4	1-column	HTML block with <code>03_upcoming_events_heading.html</code>
5–7	2-column ×1–3	Event cards (see "Event card alternation" below)
8	1-column	Divider block
9	1-column	HTML block with <code>06_closing_paragraph.html</code> (<i>stable boilerplate — rarely edited</i>)
10	1-column	Divider block
11	1-column	HTML block with <code>07_share_button.html</code>

#	Row layout	What goes in it
12	4-column , background <code>#feba18</code>	One Image block per column: Facebook, Instagram, X, Website icons (64px each, linked)
13	2-column	Left: Image block (SDSP logo, 230px). Right: Image block (UCSD logo, 230px)
14	1-column	HTML block with <code>08_footer.html</code>

Divider block note: recommend using the built-in dividers in Emma, but there is a simple grey line divider found in `optional_divider.html` if needed.

★ Event card alternation — IMPORTANT

The "Upcoming Events" section can show **1, 2, or 3 event cards maximum**. More than 3 starts to feel like a digest, not a welcome — and dilutes each event. If SDSP has more than 3 events to feature, pick the 3 most relevant to new subscribers and link to the website for the rest.

Each card is its own 2-column row. Alternate the orientation as you go down for visual rhythm — text-then-image, then image-then-text, then text-then-image again. Use these files:

- `04_event_card_left.html` → text in **left** column, image in **right** column
- `05_event_card_right.html` → image in **left** column, text in **right** column

Number of events	Order
1 event	<code>04_event_card_left.html</code> only
2 events	<code>04_event_card_left.html</code> , then <code>05_event_card_right.html</code>
3 events	<code>04_event_card_left.html</code> , then <code>05_event_card_right.html</code> , then <code>04_event_card_left.html</code>

Each event card needs a 2-column row in Emma. Drop the text-side HTML into one column and a **native Image block** into the other (matching the orientation). For each event, you're filling in: title, ~30-word blurb, date, the More Details URL (in the HTML), and uploading one event image (in the Image block).

Image uploads

For every Image block, upload the PNG directly to Emma's image library when you add the block. Emma will host the image on their CDN automatically — no need to host elsewhere.

Images you'll need:

- **Full SDSP logo with tagline** (~327px, row 1) — use the full version that includes "Community, Learning, and Research"
- One image per event card (~250px wide, row 5–7) — workshop topic illustration, flyer crop, photo, etc.

- Facebook / Instagram / X / Website icons (row 12, 64px each)
- **SDSP logo** (~230px, row 13) — can be the simpler logo here, not the full-tagline version
- UCSD logo (~230px, row 13)

Brand reference

Same palette and fonts as the workshop template (deliberate brand cohesion):

- Headings (navy): **#182b49**
 - Body text (grey): **#444a5b**
 - Footer text (near-black): **#101112**
 - Button / accent (light blue): **#3aabee0**
 - Social row background (yellow): **#feba18**
 - Font: Arial, Helvetica, sans-serif
-

What to fill in (cheat sheet)

File	Placeholders
<code>01_header_title.html</code>	<code>{{HEADLINE}}</code> — recommended: "Welcome to the San Diego Science Project" (simple, evergreen, doesn't fight the paragraph's "Hi there!" hook). See title options section below for alternatives.
<code>02_welcome_paragraph.html</code>	<code>{{SDSP_WEBSITE_URL}}</code> (<i>set once</i>) — stable boilerplate otherwise. Describes SDSP's partnership with UC San Diego and the SD County Office of Education, the California Science Project network, and research partners like Scripps and Birch Aquarium.
<code>03_upcoming_events_heading.html</code>	(<i>no edits — says "Upcoming Events"</i>)
<code>04_event_card_left.html</code>	<code>{{EVENT_TITLE}}</code> , <code>{{EVENT_BLURB}}</code> , <code>{{EVENT_DATE}}</code> , <code>{{MORE_DETAILS_URL}}</code> (URL appears 2x — use Find & Replace)
<code>05_event_card_right.html</code>	Same placeholders as 04
<code>06_closing_paragraph.html</code>	<code>{{SDSP_EVENTS_URL}}</code> (<i>set once</i>) — stable boilerplate otherwise. Includes a call-to-action encouraging readers to refresh their practice, connect with the community, and explore upcoming workshops at sdscienceproject.org .
<code>07_share_button.html</code>	<code>{{SHARE_URL}}</code> (appears 2x — use Find & Replace)
<code>08_footer.html</code>	<code>{{YEAR}}</code> — current year for copyright; unsubscribe + mailing address use Emma's standard merge tags

Workshop topics — suggested event blurbs

SDSP workshops span a range of timely, relevant topics. Use these as starting points for `{{EVENT_BLURB}}` when filling in event cards. Each is ~30 words — adapt as needed for a specific workshop within the topic.

Topic	Suggested blurb
Science Media Literacy	Help students evaluate scientific claims, spot misinformation, and think critically about the science they encounter in the real world.
Climate Education	Connect with UC San Diego researchers and explore place-based, phenomenon-driven approaches to teaching climate science, from local coastlines to global systems.
AI & Science Communication	Examine how artificial intelligence is reshaping the way science is produced and communicated — and what that means for your classroom.
NGSS & Assessment Design	Expand your skills for designing equitable, student-centered assessments aligned to the Next Generation Science Standards.

These topics aren't exhaustive — SDSP workshops also cover emerging areas as they come up. If your event doesn't fit one of these, write a ~30-word blurb in the same style: what the workshop is about, who it helps, and what teachers take away.

Title options

The "San Diego Science Project: ____" pattern matches the workshop template ("Series: Workshop @ Location"), but for the one-pager you can also drop the colon altogether since this email is about identity, not an event. Some options in order of recommendation:

1. **Welcome to the San Diego Science Project** (*recommended*) — simple, evergreen, sets up the "Hi there, it's nice to meet you!" intro without competing with it.
2. **San Diego Science Project: Welcome to the community** — keeps the colon pattern from the workshop template for brand cohesion.
3. **San Diego Science Project: Community, Learning, and Research** — uses their actual tagline. More institutional, less warm.
4. **Meet the San Diego Science Project** — slight twist, inviting tone.

Pick whichever fits the audience. Option 1 is the safest evergreen choice.

Preview

Open [assembled_preview.html](#) in any web browser to see what the final email looks like with sample images filled in. Use it as a visual reference.
