

SDSP Workshop Email Template — Plug-and-Play Guide

This is a reusable email template for SDSP workshop announcements. The visual design matches past SDSP workshop emails. To use it for a new workshop, you'll:

1. Open each `.html` file in any text editor (Notepad, TextEdit, VS Code, even Google Docs in plain-text mode).
2. Find every `{{PLACEHOLDER}}` and replace it with your workshop's content.
3. Copy the file's contents and paste into an Emma **HTML block** in the order below.

Tip: Use your editor's Find & Replace (`Ctrl+H` on Windows, `Cmd+H` on Mac) to swap placeholders quickly.

How to assemble in Emma's drag-and-drop editor

Emma uses **rows** (with 1-4 columns) and **content blocks** that you drop into columns. You'll add rows top-to-bottom in this order:

#	Row layout	What goes in it
1	1-column	Image block (upload SDSP logo, ~327px) then HTML block with <code>01_header_title.html</code>
2	1-column	HTML block with <code>02_intro_paragraph.html</code>
3	1-column	Divider block (native Emma block, light grey)
4	1-column	HTML block with <code>03_workshop_heading.html</code>
5	1-column	HTML block with <code>04_workshop_description.html</code>
6	1-column	HTML block with <code>05_workshop_outcomes_list.html</code>
7	1-column	HTML block with <code>06_workshop_takeaway.html</code>
8	1-column	Divider block
9	1-column	HTML block with <code>07_event_details_heading.html</code>
10	2-column	Left: HTML block with <code>08_event_details_left.html</code> . Right: Image block (upload workshop topic image, ~250px)
11	1-column	HTML block with <code>09_register_button.html</code>
12	1-column	Divider block
13	1-column	HTML block with <code>10_about_sdsp.html</code> (<i>stable boilerplate — no edits needed</i>)
14	1-column	Divider block

#	Row layout	What goes in it
15	1-column	Image block (upload workshop flyer, ~500px, link it to the registration page)
16	1-column	Divider block
17	1-column	HTML block with <code>11_share_button.html</code>
18	4-column, background <code>#feba18</code>	One Image block per column: Facebook, Instagram, X, Website icons (64px each, linked to your social pages)
19	2-column	Left: Image block (SDSP logo, 230px). Right: Image block (UCSD logo, 230px)
20	1-column	HTML block with <code>12_footer.html</code>

Total row width: target 500px (Emma's default content width works fine).

Divider block note: recommend using the built-in dividers in Emma, but there is a simple grey line divider found in `optional_divider.html` if needed.

Image uploads

For every Image block, upload the PNG directly to Emma's image library when you add the block. Emma will host the image on their CDN automatically — no need to host elsewhere.

Images you'll need:

- SDSP logo (used in row 1 and row 19)
- Workshop topic image (row 10, optional but recommended)
- Workshop flyer (row 15, optional)
- Facebook / Instagram / X / Website icons (row 18)
- UCSD logo (row 19)

Brand reference

These are the colors and fonts baked into the template:

- Headings (navy): `#182b49`
- Body text (grey): `#444a5b`
- Footer text (near-black): `#101112`
- Button / accent (light blue): `#3aabee0`
- Social row background (yellow): `#feba18`
- Font: Arial, Helvetica, sans-serif

What to fill in (cheat sheet)

File	Placeholders
01_header_title.html	{{HEADLINE}} — e.g. "Summer Professional Learning Events: Science Media Literacy Workshop @ UC San Diego"
02_intro_paragraph.html	{{INTRO_HOOK}}, {{WORKSHOP_OFFERING_SENTENCE}}
03_workshop_heading.html	{{WORKSHOP_NAME}}
04_workshop_description.html	{{WORKSHOP_DESCRIPTION}}
05_workshop_outcomes_list.html	{{OUTCOME_1}}, {{OUTCOME_2}}, {{OUTCOME_3}} (add more lines if needed)
06_workshop_takeaway.html	{{TAKEAWAY_SENTENCE}}
07_event_details_heading.html	(no edits — says "Event Details")
08_event_details_left.html	{{DATE}}, {{TIME}}, {{LOCATION}}, {{AUDIENCE}}, {{COST}}
09_register_button.html	{{REGISTRATION_URL}} (appears 2x — use Find & Replace)
10_about_sdsp.html	{{SDSP_WEBSITE_URL}} (set once, then leave this file alone) — describes SDSP's partnership with UC San Diego and the SD County Office of Education, the California Science Project network, research partners (Scripps, Birch Aquarium), and frames workshops as professional learning designed by educators, for educators.
11_share_button.html	{{SHARE_URL}} (appears 2x — use Find & Replace)
12_footer.html	{{YEAR}} — current year for copyright line; unsubscribe + mailing address use Emma's standard merge tags

Workshop topics — content reference

SDSP workshops span a range of timely, relevant topics. Use this as a reference when writing your {{INTRO_HOOK}}, {{WORKSHOP_DESCRIPTION}}, and outcomes. Each HTML file also has topic-specific examples in its comments.

Topic	What it covers	Example outcomes
Science Media Literacy	Help students evaluate scientific claims, spot misinformation, and think critically about the science they encounter in the real world.	evaluate science-related claims; identify misinformation tactics; think critically about sources
Climate Education	Connect with UC San Diego researchers and explore place-based, phenomenon-driven approaches to	construct models using the Understanding Global Change framework; create evidence-based explanations for local climate

Topic	What it covers	Example outcomes
	teaching climate science, from local coastlines to global systems.	phenomena; connect local observations to global systems
AI & Science Communication	Examine how artificial intelligence is reshaping the way science is produced and communicated — and what that means for the classroom.	assess how AI tools generate and present scientific information; evaluate AI-produced science content for accuracy and bias; integrate AI literacy into existing science curricula
NGSS & Assessment Design	Expand skills for designing equitable, student-centered assessments aligned to the Next Generation Science Standards.	design equitable, student-centered assessments; align assessment tasks to NGSS performance expectations; use assessment data to inform inquiry-based instruction

These topics aren't exhaustive — SDSP workshops also cover emerging areas as they come up. When writing for a new topic, follow the same pattern: ground it in the Next Generation Science Standards, frame it around the real challenges teachers face, and aim to leave educators feeling confident, connected, and equipped.

Why SDSP workshops matter

Science education is most powerful when teachers feel confident, connected, and equipped. SDSP workshops are designed to build lasting teaching skills by helping educators bring relevant, inquiry-based science into their classrooms in ways that resonate with their students. SDSP provides long-term, targeted professional development for K-12 teachers, grounded in the Next Generation Science Standards and cognizant of the real challenges teachers face. Keep this framing in mind when writing workshop copy — it's the "why" behind every SDSP event.

Preview

Open [assembled_preview.html](#) in any web browser to see what the final email looks like with the original Science Media Literacy Workshop content filled in. Use it as a visual reference.
